Art Unit: 2853

This application is in condition for allowance except for the following formal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### ***Election/Restrictions***

Newly submitted or amended claims 1, 2, 5-10, 34-48 and 53-61 are directed to inventions that are independent or distinct from the invention originally claimed for the following reasons:

Claims 1, 2, 5-10, 46-48, 58 and 59 are directed to a method of maintaining a printing cartridge, method of making a printing cartridge or a printing cartridge including a controller disposed on the printing cartridge as disclosed in relation to the embodiment of figure 4 of applicant's disclosure. These claims lack the step of a determination of a remaining useful life of the cartridge by comparing printing history of the cartridge with a threshold as in allowable claims 3, 4, 20-22 or 25-33 (which in turn lack the limitation of the controller disposed on the cartridge).

Claims 34-41, 43-45, 53, 54, 57, 60 and 61 are directed to a method of refilling a printing cartridge, printing cartridge or refilling system including replenishment of different kinds of consumable substances dependent on the usage information or history data as explained in view of the embodiment of figure 1 of applicant's disclosure. These claims lack the step of a determination of a remaining useful life of the cartridge by comparing printing history of the cartridge with a threshold as in allowable claims 3,

Art Unit: 2853

4, 20-22 or 25-33 (which in turn lack the limitations related to different kinds of consumable substances).

Claims 42, 55 and 56 are directed to a printing cartridge refilling apparatus including a database of information about different printing cartridges as explained in view of the embodiment of figure 11 of applicant's disclosure. These claims lack the step of a determination of a remaining useful life of the cartridge by comparing printing history of the cartridge with a threshold as in allowable claims 3, 4, 20-22 or 25-33 (which in turn lack the limitations related to a database of information about different cartridges).

These three groups of claims are each seen to be properly distinct species of applicant's disclosed invention from claims 3, 4, 20-22 or 25-33 since they each containing distinct subject matter as explained above and are considered non-obvious over one another. See MPEP 808 and 821.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 1, 2, 5-10, 34-48 and 53-61 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

A telephone call was made to applicant's representative on October 28, 2004 to request cancellation of the non-elected claims but a formal notification of election by original presentation was requested.

Art Unit: 2853

Applicant is given TWO MONTHS from the date of this letter to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

***Terminal Disclaimer***

The terminal disclaimer filed on October 01, 2004 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of US Patent 6,789,864, has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Allowable Subject Matter***

The terminal disclaimer filed October 01, 2004 has overcome the non-statutory double patenting rejection of claims 3, 4, 20-22 and 25-33. These claims stand allowable.
